FAIR PLAY

Participating in Sports
at the Collegiate Level

LEVELS

- Intercollegiate Sports
 - Division I, II, III
- Club Sports
- Intramural Sports

NCAA SPORTS

- THE NCAA administers 88 championships in 23 sports for its member institutions.
- Scholarships are available for NCAA sports.
- There are several other sports for which the NCAA does not conduct championships or establish rules and regulations; these are traditionally called club sports.

NCAA ELIGIBILITY

- All high school athletes wishing to compete in college at the Division I or II levels register with the Initial-Eligibility Clearinghouse
- To apply online, students can go to www.ncaaclearinghouse.net

CLUB SPORTS

- Clubs sports are recognized student organizations that serve students' interests in intercollegiate club competition.
- They provide a recreational outlet for students in a competitive setting that is less formal and with a minimum of faculty/staff supervision.
- Club sports are designed as an alternative, bridging the gap between existing intramural sports and varsity sports.
- Emphasis is on student initiative, not only in competition, but also in team management.

INTRAMURAL SPORTS

- Intramurals are fun, recreational, social and competitive on-campus, non-intercollegiate sports activities for students.
- These are designed with the everyday athlete in mind. This is a great opportunity for you to have some fun and to try that new sport you've always wanted to learn!
